Additional Considerations

- Right the wrongs of the past by building household wealth through homeownership, critical home repairs for legacy residents and through business ownership, particularly in historically red-lined communities.
- Center diversity, equity and inclusion as proactive outcomes of state investment, including through the hiring of MBE/WBE businesses and local residents for project implementation.
- Improve the health of community residents through increased health services, healthy homes, increased walkability and recreation, and other creative ways to address the social determinants of health in disinvested communities.
- Increase community resilience to the impacts of climate change and roll back environmental injustices.
- Contribute to the economic strength of the 34 historic Main Street Maryland communities, Main Street Affiliate communities, 9 Baltimore City Main Street communities and other historic commercial corridors.
- Promote access to mixed-income housing at Transit Oriented Developments.

Proposed Budget:

- Be specific - **WHAT** are we paying for?
- Any additional sources noted in the budget must be verified (please include attachments).
